

V-Seal 101

- Excellent for concrete pavers, new / old concrete & stucco
 - Yields a flat invisible appearance, won't change color
 - Won't make surface slippery
 - Protects against water / salt damage and contaminates
 - Sealer becomes a permanent part of the substrate
 - Good for the cure and / or post seal

V-Seal 102

- Perfect for concrete pavers, new & old concrete, concrete block,
 - split-face block and porous cementitious substrates
 - Provides extra protection in colder climates
 - Invisible flat finish won't change color or slip factor
 - Can be tinted to provide a decorative appearance

Industra-Gloss WB

- Pavers, brick, new / old concrete, decorative concrete
 - Water borne, safe, very low odor
 - Indoor / outdoor applications, stampcrete & acid stained concrete
 - Protective satin finish; gloss with 2 coats
 - Will slightly enhance color

Industra-Gloss SB

- Pavers, brick, travertine, limestone, exposed aggregate,
 - new / old concrete, all decorative concrete
 - Will enhance original color
 - Provides "wet look" multiple coats = more shine
 - Provides a durable non-yellowing protective barrier

Industra Seal 117

- Ideal for garage, basement and warehouse floors with a smooth
 - machine trowel surface
 - Satin finish that can be buffed to a shine or through routine cleaning
 - Excellent overall densifier, hardener & dust proofer

V-Stop HD

- Excellent for vertical brick, concrete, split face block & pre-cast
 - Waterproofs concrete & masonry (2 coats recommended)
 - Non-yellowing, clear finish
 - Will significantly reduce efflorescence & spalling
